Movement and structure, held to one standard.

This profile sets out who Crest Solutions Ltd is, what the company does, how it works and the standard it holds across materials logistics and construction, from origin markets to handover. Logistics coverage is not limited to the East African corridor; it can extend to other origin markets as a client's supply chain requires.

01 / WHO WE ARE

A company built around the handover.

Crest exists to close the gap between movement and construction. We source and consolidate materials in Dubai, China and other origin markets, move them through the East African corridor, and carry the construction and finishing works on site. Clients get one plan, one reporting rhythm and one accountable lead.

Two disciplines, one operating standard. The planning discipline that routes materials from origin markets is applied to a residential build. The close-out rigour that finishes an apartment is applied to a movement. The client does not manage the seam.

LEGAL NAME

Crest Solutions Ltd

BASE

Kigali, Rwanda

COVERAGE

East Africa / Dubai / China / global origins

DIVISIONS

Logistics / Construction

TEAM

Levis Ishimwe

MANAGING DIRECTOR

Accountable for the operating standard across both divisions.

MUNEZERO Clément

HEAD OF ENGINEERING

Leads technical delivery, engineering and construction quality.

Bideri Alec

PROJECT MANAGER

Runs project planning, logistics coordination and handover.

---

02 / WHAT WE DO

Two disciplines, one operating standard.

Each division can stand alone. The advantage appears when a client needs both, and the seam between them disappears.

Logistics is not bounded by the East African corridor. We source and consolidate in Dubai, China and other origin markets, and can extend coverage as a client's supply chain requires.

01 / CONSTRUCTION

Things that stand.

Crest Construction takes on residential, commercial, fit-out and finishing works where the site is complex, the programme is tight and the client needs one team from survey to close-out. We build and finish with the end of the asset in mind: maintainable, documented and ready to use.

- Residential apartments
- Commercial and retail fit-out
- Construction finishing
- Civil works and earthworks
- Structural frames and envelopes
- Infrastructure and external works
- Project management
- Start-to-finish delivery

02 / LOGISTICS

Things that arrive.

Crest Logistics moves cargo, construction materials and project equipment from origin markets in Dubai, China and beyond to sites across East Africa. We plan the route, hold the documentation, manage the carriers and stay on the movement until it is closed out.

- Origin sourcing and consolidation
- Freight forwarding and customs
- Project cargo and heavy lift
- Construction materials supply
- Equipment sourcing and mobilisation
- Warehousing and distribution
- Last-mile and site delivery
- Supplier and site coordination

03 / HOW WE WORK

Read. Design. Deploy. Assure.

The method is the same whether the deliverable is a building or a movement. Every stage has a defined output, a named owner and a document that survives the team.

01

Read the ground

We start with the site, the route, the season and the permit. The plan is built around real constraints, not assumptions.

02

Design the route

We choose the mode, the sequence and the team. Every dependency gets an owner and a date.

03

Deploy the team

Owned capacity and vetted partners mobilise against one schedule. One lead holds the line.

04

Assure the handover

We report against the plan, close out the record and stay available after the keys or the cargo change hands.

04 / WHERE WE WORK

Global origins. East African delivery.

Kigali is the base of operations. Our network connects Dubai and Guangzhou to the East African corridor, and can extend to other origin markets.

Dubai	UAE	Origin sourcing and consolidation
Guangzhou	China	Supplier consolidation
Mombasa	Kenya	Port and inbound freight
Nairobi	Kenya	Consolidation and line-haul
Kampala	Uganda	Border clearance and distribution
Kigali	Rwanda	Base of operations
Dar es Salaam	Tanzania	Southern inbound route

05 / PROJECT RECORD

Current projects.

Residential, commercial and international materials records. Each entry is confirmed with the project team as the record is completed.

NO.	PROJECT	SECTOR	LOCATION	YEAR
01	Meraki New Residence Materials logistics / fit-out / construction finishing	Integrated	Kibagabaga, Kigali	2025 to 2026
02	Ohana Residence Materials logistics / fit-out / construction finishing	Integrated	Nyarutarama, Kigali	2025 to 2026
03	RG Market Plaza Fit-out / construction finishing	Construction	Kigali, Rwanda	2025 to 2026
04	International Materials Programme Origin consolidation / freight / customs / site delivery	Logistics	Dubai and China to Kigali	2025 to 2026

06 / CONTACT

Start with the ground truth.

Send the route, the site, the dates and the constraint. We will come back with a plan or a straight answer.
